

18Ah battery with 1kW inverter

What is a '18Ah' battery?

An '18Ah' battery is a rechargeable battery with a capacity of 18 ampere-hours. They offer a balance between runtime, size, weight, and cost, making them a versatile choice for a variety of applications.

What is a powerpod inverter?

Unlike traditional SMF-based inverters, which require battery replacements and periodic equalization, POWERPOD Inverters feature an advanced Battery Management System (BMS) to control lithium battery parameters. With Lithium LifePO4 cells sealed in a battery pack, there's no need for water topping, eliminating security hazards.

What is a powerpod lithium ion compact inverter?

POWERPOD Lithium Ion Compact Inverters offer significant energy savings compared to traditional lead-acid batteries. Unlike lead-acid batteries, which waste energy and continue charging even when fully charged, POWERPOD's lithium batteries halt charging once fully charged, eliminating unnecessary electricity consumption.

How long does a powerpod lithium ion compact inverter take to charge?

Experience rapid charging with POWERPOD Lithium Ion Compact Inverters. While traditional SMF batteries require a minimum of 10 hours to charge, POWERPOD's inbuilt lithium batteries charge in less than 6 hours.

How does a powerpod battery inverter work?

POWERPOD Battery Inverters feature automatic voltage regulation, seamlessly switching to battery power in instances of low or high supply voltage. This ensures the safety of all connected machinery and equipment by maintaining operation within a safe voltage range.
