What is a frequency inverter?

Also called Frequency Converter, it's a power conversion device running at mains power (60Hz / 50Hz). The frequency inverter converts a basic fixed frequency (50Hz/60Hz), fixed voltage (220V/380V/480V etc.) to a variable frequency (maximum frequency up to 400Hz), variable voltage (maximum voltage equal to input voltage) to control AC motor speed.

What is a variable frequency drive inverter?

The variable frequency drive inverter is widely applied in industrial manufacturing, transportation, energy, construction, etc. 1.5kW frequency drive inverter, single phase 120v input, single phase and three phase 220v output. 2hp variable frequency drive inverter can drive single/three AC motors with 120v power.

What is a 3 hp variable frequency drive inverter?

2.2 kW (3 hp) frequency drive inverter, single phase 120v input, single phase and three phase 220v output, with IP20 protection and RS485 communication interface. 3 hp variable frequency drive inverter can run 1ph/3ph AC motor via 120v power supply, work at (-10%, 40%).

What is a single phase output frequency inverter?

The single phase output frequency drives are widely used to control the speed of motors in various equipments such as pumps, ventilation systems, elevators, machine tool drives, etc. 0.75kW single phase output frequency inverter for sale, 1-phase input to 0~input voltage 1-phase output at 220V/230V/240V.
