

5G base station communications in Namibia

Are Namibia's new mobile base stations 5g-enabled?

Telecom Namibia has revealed that all new mobile base stations currently being deployed are 5G-enabled as it pushes ahead with efforts to modernise its network and expand access to high-speed connectivity across the country.

Why is 5G a key part of Namibia's strategy?

Dr Shanapinda said the rollout of 5G infrastructure was a key part of the company's strategy to keep Namibia in step with global advancements in mobile technology. "Our discussions today have laid a strong foundation for intensified collaboration, ensuring that together, we can empower every Namibian through cutting-edge ICT," he said.

How will 5G work in Namibia in 2022?

This comes after Cabinet approved the deployment of 5G technology in Namibia in 2022, which is meant to deliver higher multi-data speeds, more reliability, and massive network capacity. The visit focused on strengthening cooperation between MICT and Telecom Namibia, with discussions covering a number of national ICT priorities.

Why did MICT visit Telecom Namibia?

As part of the visit, the MICT delegation toured Telecom Namibia's data centre and billing server room to gain a better understanding of the infrastructure supporting the country's digital services.

The number of wireless base stations of Docomo, KDDI, Softbank, and Rakuten carriers (MNO: Mobile Network Operator) as of the end of ...

The telco says the move marks a significant milestone in the journey to build a robust and secure digital future for Namibia.

Namibia's premier digital enabler, MTC, has announced the deployment and availability of 5G services in the country. MTC made the announcement today (24 August ...

The fifth generation (5G) networks can provide lower latency, higher capacity and will be commercialized on a large scale worldwide. In order to efficiently deploy 5G networks on the ...
