

## 700va inverter price

How many watts can a 700 watt inverter run?

The inverter can run a 700 wattload for 2.4 hours. Notice that we divided 31.2 amps with 75ah,not 150ah. That is because a deep cycle battery has a 50% discharge rate (DOD) so only 75ah is usable. If you have a new AGM or gel battery the DOD can reach 70%. For lithium batteries you can fully discharge it without causing damage.

What is livguard sine wave inverter?

Introducing the Livguard Sine Wave Inverter,where innovation meets uninterrupted power supply. Designed for modern homes and the most demanding electrical loads,this inverter guarantees a seamless and stable power flow.

Why should you buy a livguard inverter?
