

"We continue our infrastructure modernization efforts, thanks to which the residents of Abovyan and Ejmiatsin are now also joining our growing family of 5G users.

In the NSA architecture, the (5G) NR base station (logical node "en-gNB") connects to the (4G) LTE base station (logical node "eNB") via the X2 interface. The X2 interface was ...

Ucom is proud to announce the launch of its 5G network in Yerevan, a significant milestone in the company's digital transformation.

A radio access network (RAN) connects 5G-enabled devices to the 5G core network. It is a major part of the 5G network. The 5G RAN consists of base stations (gNodeB), remote radio units ...

The non-standalone model includes both 4G and 5G base stations, but the 4G base station is dominant. Since the 5G control plane is anchored in the EPC, ...

The frequencies, infrastructure, equipment, and software resources freed up after the shutdown of 2G will make it possible to rapidly expand 4G and 5G coverage nationwide, ...

Our Non-Standalone 5G operates on a 4G LTE Evolved Packet Core (EPC) foundation. This architecture incorporates both 4G and 5G base stations, with the 4G infrastructure serving as ...

With the rapid development of 5G base station construction, significant energy storage is installed to ensure stable communication. ...

The implementation of 5G technologies is associated with a number of difficulties, including the cost of upgrading the infrastructure of mobile operators. Therefore the introduction of different ...

Armenia's largest mobile network expands even further - Armenia's Leading Mobile Operator VivaCell-MTS doesn't stop on what was achieved. Today another 2.5G/3.5G ...

Ucom announces the completion of the second phase of the 5G network launch: now the new network is operational in the cities of Akhtala, Berd, Ijevan, Maralik, Martuni, ...

From 4G to 5G technologies, Faststream has followed an evolutionary approach, with a strong emphasis on delivering able next-generation experiences and connections for our customers ...

Base stations are one of the widely used components in the field of wireless communication and networks. It is an access point or base point of a ...

The non-standalone model includes both 4G and 5G base stations, but the 4G base station is dominant. Since the 5G control plane is anchored in the EPC, radio frequency signals are ...

Tower Maps provides a comprehensive database of cell towers and wireless antenna sites in the US, offering accurate and up-to-date information.

Mobile network operator (MNO) MTS Armenia (Viva-MTS) has heralded the launch of its 5G network. In a press release, the MNO claimed a "first" for the nation and outlined its rationale ...

Explore the inner workings of 5G base stations, the critical infrastructure enabling high-speed, low-latency wireless connectivity. Discover their components, architecture, enabling ...

Under the terms of the permits, Viva Armenia is required to deploy 5G mobile broadband services--initially with outdoor coverage--across key areas of the country over the ...

A 5G network station, also known as a 5G base station or 5G cell site, is a critical component in the deployment of a 5G wireless communication network. It plays a key role in ...

As part of the obligations in these permits, mobile communication coverage, including broadband 5G technology, must be available in at least 60% of urban areas within 3-7 years. This ...

5G base stations are the backbone of the 5G network, transmitting and receiving radio signals across various frequency bands to provide connectivity to mobile devices.

Armenia's Public Services Regulatory Commission (PSRC) discussed and adopted a number of decisions on the introduction of 5G mobile communication technology.

With the increasing amounts of terminal equipment with higher requirements of communication quality in the emerging fifth generation mobile ...

As per 3GPP specifications for 5G NR, it defines three classes for 5G NR base stations: Wide Area Base StationMedium Range Base StationLocal Area Base ...

The 5G base station was developed by China Mobile Communications Group and the Chinese People's Liberation Army China has ...

Armenia Communications 5G Base Station Branch
