

Construction underway on 150 megawatt, two-hour big battery in first stage of \$2 billion series of solar and storage projects being built in the ...

Investor interest in clean energy is booming. The Clean Energy Council's Q1 2025 report revealed that six major BESS projects secured ...

Listed below are the five largest energy storage projects by capacity in Australia, according to GlobalData's power database. GlobalData uses proprietary data and analytics to ...

The government of Western Australia (WA) announced last week (15 March) that the construction phase has begun at Collie, a battery energy ...

Wooreen Energy Storage System will be constructed on the traditional lands of the Brayakaulung people of the Gunaikurnai nation. EnergyAustralia respects and acknowledges their continued ...

Since then, investment in grid-scale battery energy storage in Australia's National Electricity Market - or NEM - has continued. 25 projects are now commercially ...

3 days ago; Flatiron Energy is a US BESS developer, so far focused on the northeast. Image: Flatiron Energy. Flatiron Energy has commenced initial proceedings to construct a ...

Australian energy giant AGL has added two pumped hydro projects with a combined capacity of almost 1.4 GW, each with 10 hours of energy ...

This pioneering project is Western Australia's first large-scale solar and battery energy storage system, as well as the region's first solar hybrid project-setting a new ...

Recently, Trina Solar has submitted a development application to relevant Australian authorities, planning to develop a large-scale energy storage project with a capacity ...

Investment in large-scale battery storage is on the rise. The projects store up renewable energy generated during the day that can be used during peak periods. What's ...

By enabling large-scale, grid-forming storage projects like Eurimbula, SMA Australia and Elements Green are helping to shape a ...

Australia develops energy storage projects

Business intelligence company Rystad Energy has said that almost 4 GW of utility-scale battery energy storage systems (BESS) entered construction in the first nine months of ...

This initiative will start in Victoria. Envision Energy has partnered with FERA Australia for the development of large-scale hybrid renewable energy projects across ...

The volume of large-scale battery energy storage projects under construction in Australia passed that of solar and wind projects combined in ...

Investor interest in clean energy is booming. The Clean Energy Council's Q1 2025 report revealed that six major BESS projects secured funding, totaling AUD 2.4 billion and ...

2 days ago; Lock Energy Center is located on the same site as NEER's Key Energy Storage development, with the two BESS projects sharing a gen-tie line connecting them both to the ...

Renewable storage technologies have the potential to revolutionise clean and reliable energy access in remote communities, support cost-effective decarbonisation in industry and ...

Since then, investment in grid-scale battery energy storage in Australia's National Electricity Market - or NEM - has continued. 25 projects are now commercially operational in the NEM, ...

Following the procurement and contractual close of the Kidston Pumped Hydro Project and Snowy 2.0, multiple pumped hydro energy storage ...

Investment in large-scale battery storage is on the rise. The projects store up renewable energy generated during the day that can be used ...

Business intelligence company Rystad Energy has said that almost 4 GW of utility-scale battery energy storage systems (BESS) entered ...

The project, which pairs the 128 MWh DC-coupled battery with an 80 MW AC solar farm, marks a significant step in Australia's transition to co-located hybrid renewable energy ...

Chinese smart renewable energy solutions provider Envision Energy has joined forces with FERA Australia to develop up to 1 GW of wind and 1.5 GWh of battery storage ...

By enabling large-scale, grid-forming storage projects like Eurimbula, SMA Australia and Elements Green are helping to shape a resilient, reliable, and renewable energy ...

Renewable storage technologies have the potential to revolutionise clean and reliable energy access in remote

communities, support cost-effective ...

US Scientists have developed an algorithm to predict electric grid stability using signals from pumped storage hydropower projects.

4 days ago· A 12GWh pumped hydro project and a 1,200MWh battery energy storage system in New South Wales have been submitted to Australia's EPBC Act.

Following the procurement and contractual close of the Kidston Pumped Hydro Project and Snowy 2.0, multiple pumped hydro energy storage projects have been announced, ...

Together with states and territories, the Government considered generation, storage and transmission projects across Australia. The resulting list delivers five renewable ...

ACEnergy is also behind the 264MWh Apsley and 1,100MWh Yanco BESS, both located in New South Wales. Image: ACEnergy. Developer ACEnergy has seen its ...
