

What type of plug is used in Austria?

In Austria, types C and F are the official standards. Like almost all Continental European countries, Austria has standardized on the German plug and socket system. What is the mains voltage in Austria? Just like the rest of Europe, the voltage in Austria is 230 volts and the frequency is 50 Hz. Austria has standardized on type F sockets and plugs.

Which plug sockets can be used in Austria?

Type C and type E plugs can also be used thanks to their compatibility with type F sockets. Typically, type C plug sockets are not allowed to be installed in Austria: these outlets are not earthed and are therefore considered dangerous. Only type F power points are permitted because they are grounded and therefore significantly safer.

What voltage does Austria use?

Also, the voltage in Austria is the same as in Europe. What Outlet does Austria Use? Type C plug sockets are used in Europe, Africa and Asia. They have two round pins and no grounding pin. These plugs are typically used with devices that have a voltage of 220-240V. This outlet is rated for 2.5 amps.

Do you need a travel adapter in Austria?

(Just kidding.) Visitors from the USA, for example, also need an adapter, not least since the standard voltage in Austria is higher than in the US (at 230 V), and the standard frequency of 50 Hz is different, too. Where can you get travel adapters in Vienna?
