

How to install a power distribution cabinet?

The Power Distribution Cabinet should be placed and installed on a floor with concrete structure or made of other solid and non-combustible materials. The interior space should have good ventilation as well as temperature and humidity control, and keep away from gas and corrosive substances.

What is a power distribution cabinet?

For wiring, the Power Distribution Cabinet allows top wiring and bottom wiring. The front of the Power Distribution Cabinet features a lockable front door and two protective doors inside; the back features a lockable split rear door and a protective plate inside.

How do I remove the side panels of the power distribution cabinet?

If the space for installation allows, you can temporarily remove the side panels of the Power Distribution Cabinet for easy installation. Please see the following instructions: 1 Remove the key attached to the front door and use it to unlock the side panels. 2 To remove a side panel, hold on the handles on both sides, and then pull them up.

What power levels can a power distribution cabinet use?

You can flexibly choose different power levels (30kVA, 50kVA, 80kVA, 100kVA or 125kVA) according to your power demands to your system. The Power Distribution Cabinet can be used with a transformer for voltage conversion, or installed with Transient Voltage Surge Suppressors (TVSS) to protect highly sensitive equipment.

How to check the status of a power distribution cabinet?

The LCD monitor of the Power Distribution Cabinet can display the current system status and event logs, and allows you to set and view parameters. If the back light is not lit, pressing any button will activate it. On the initial status screen, you can view the system date and time as well as the switch-board circuit breaker status.

Can a power distribution cabinet be moved on an incline or ramp?

In moving the Power Distribution Cabinet on an incline or ramp, the slope cannot exceed fifteen degrees to avoid dumping. Please find the specification labels on the wooden case first. Then confirm whether the Power Distribution Cabinet is consistent with your ordered specifications.
