How does Breeze work?

For pipeline vendors Breeze will build an LDES from the compressors to a destination. Just like the pipeline vendors receive orders for natural gas pipelines. For electric generation vendors Breeze will build a power plant from the source of compressed air.

What products does Future Breeze power offer?

Where do Breeze lights work?

Breeze Lights work anywhere there is a slight wind up to 50 mph gales. Put them under trees where solar lights won't work. Light every night for a week even without winds. 1/3rd of the population live under tree canopy and are frustrated with the poor performance of solar lights. Breeze Lights solve their problem.

What is the difference between Breeze and hot air?

For heavy industries Breeze will build the passthrough of compressed air. Just like heavy industries send purchase orders to compressed air companies. For food processing, wood drying, and chemical plants. Breeze will build the passthrough of hot air. Just like these vendors send purchase orders to HVAC companies.
