

China Communications 5G Base Station Planning in 2025

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

How many 5G base stations are there in 2024?

"Accumulatively, there were over 2.4 million 5G base stations put into use [at the end of 2024]. We have built the world's first large-scale commercial 5G-A network, with RedCap covering all cities nationwide and gigabit broadband covering 480 million households," said China Mobile in its annual report.

Will China build a 5G network in 2021?

"By the end of the 14th Five-Year Plan period (2021-25), China will have built the world's largest and most extensive stand-alone 5G network and basically achieve full network coverage in urban and rural areas," Wang said. Ding Yun, president of Huawei Technologies Co's carrier business group, said: "5G is no longer for early adopters."
