

Cook Islands outdoor power supply processing manufacturer

What is the future of power in the Cook Islands?

Now with full-time power, the future has taken a new shape for Cook Islands' residents thanks to government renewable energy - leading to an improved quality of life, and increased economy activity. The improved livelihood in the communities that now have the benefit of reliable, 24hour power supply is immeasurable.

How did power supply affect the islands?

Power supply was effected by issues of reliability,maintainability,capacity and access to adequate,regular diesel supplies. There were no sources of hard aggregate for concrete or reliable earthmoving equipment on the islands,so all materials,equipment and tools required for construction were supplied via a freighter.

How did we help the Cook Islands Government achieve its aim?

We helped the government realise its aim. To support the Cook Islands Government,the New Zealand Government - through the Ministry of Foreign Affairs and Trade,installed mini-grid photo-voltaic power systemsin a number of villages on six remote islands. We helped manage this logistically enjoyable project.

The Cook Islands is a net importer of energy, in the form of petroleum products. Total energy consumption was 1,677,278,000 BTU (1.77 TJ) in 2017, of which 811,000,000 (0.86 TJ) was in ...
