How much DC power does an inverter use?

If you're using an inverter to power some 120v appliances like a microwave or induction burner it takes 10 times the 12v power to make the 120v power. So you need to multiply the amp consumption of those devices by 10 to see how much DC power they'd take. Actually, because the inverter isn't 100% efficient, it's better to multiply by 13.
