

Double glass module greenhouse installation

What is a greenhouse integrated PV (gipv) module?

Get in touch! Traditional greenhouses rely on external fossil fuel derived energy sources to power lighting, heating and forced cooling. Specially designed BiPV solar glass modules for greenhouses, Heliene's Greenhouse Integrated PV (GiPV) modules offer a sustainable alternative with no additional racking or support required.

What is a single glass greenhouse?

Single glass makes for a nice show piece in your yard. Our single glass is tempered safety glass to minimize any possibility of breakage or injury. Glass appeals to gardeners who want full light transmission to control the amount of sun in the greenhouse. Single Glass 3MM, Insulating R-Value .96 Approximately 95% light transmission.

What is insulated double glass?

Insulated double glass maintains superb heat insulation for all types of growing. Our double glass is tempered safety glass to minimize any possibility of breakage or injury. Double Glass 16MM, Insulating R Value 2.1 Approximately 90% light transmission.

Which glass is best for a greenhouse?

Optional high performance Low E glass (R Value) Heat Gain = 3.45. Approximately 70% light transmission. Our 6mm twinwall polycarbonate is the most economical. It is a practical choice for a working greenhouse as it offers 50% more insulation than single pane glass and diffuses harmful sunlight in the summer.

Do You need safety glass in a greenhouse?

One solid sheet of laminated safety glass in every greenhouse bay. Similar to car windshields, this safety glass will not shatter and will remain intact even when broken. This glass type may be required for greenhouse roofs where building codes require, common for applications over swimming pools, schools, and solariums.

Do you need a forced ventilation system for a greenhouse?

For those with larger greenhouses or residing in hotter climates, it's important to consider implementing a forced ventilation system to avoid overheating. A combination of exhaust fans and motorized intake shutters with thermostat are usually necessary for this.
