

Energy storage is a rapidly growing sector in Asia as more renewables come online. This presents a range of new business opportunities

Executive summary Asia Pacific is central to global energy sector decarbonization and the world's transition to net zero. The region saw energy-related emissions grow 151% between 2000 and ...

The event was held at Bubuk substation, the connection point for the final project to be completed in a portfolio comprising BESS installations at ...

South East Asia is set to undergo an energy revolution over the next 30 years and energy storage will be a key driver of change. The region's electricity grid generated 90 per ...

Leading inverter solution supplier Sungrow is working with Super Energy, a leading renewable energy provider in South East Asia to build ...

East Asia, led by China, alone can achieve the 420-gigawatt (GW) target of the International Renewable Energy Agency for pumped storage capacity globally by 2050.

Recently, China Energy Construction Co., Ltd. has made another major breakthrough in the international new energy market, and successfully ...

BANGKOK, Nov. 15, 2021 /PRNewswire/ -- Sungrow, the global leading inverter solution supplier for renewables, cooperated with Super Energy, the leading ...

ABOITIZ POWER CORP. (AboitizPower), through Therma Power, Inc.'s wholly owned subsidiary East Asia Utilities Corporation (EAUC), is set to commence construction of ...

Wärtsilä; has delivered a number of projects in the region, including Singapore's first-ever pilot grid-scale battery energy storage system (BESS) and several large-scale ...

Pumped-storage hydropower, or simply pumped hydro, is set to play an increasing role in Southeast Asia's energy transition. This mature ...

Energy storage can enable decarbonisation around the world and Asia-Pacific is no exception, writes Hendrik Bohne of Aquila Capital.

Pumped-storage hydropower, or simply pumped hydro, is set to play an increasing role in Southeast Asia's

energy transition. This mature technology for large-scale energy ...

Discover the current state of energy storage developers in Asia, learn about buying and selling energy storage projects, and find financing options on PF Nexus.

Indonesia, Vietnam, and Thailand lead in South East Asia in terms of largest solar power projects so far driving the renewable growth The ...

The project aims to transform stretches of desert near the Red Sea coast into a sustainable business, tourism and residential development. ...

Battery energy storage systems (ESS) provide critical frequency and stability support to power grids. As one of Asia's largest battery operators, our energy storage portfolio is well-positioned ...

The technology group Wärtsilä has signed an Engineering, Procurement and Construction (EPC) contract for a new 100 MW/100 MWh total capacity energy storage project ...

Highlights include evaluating the potential for floating solar on regional waterbodies, building resilience in urban energy, water, and food systems, supporting investment decisions ...

Project combining solar and batteries to provide 1GW of "round-the-clock" dispatchable power unveiled at Abu Dhabi Sustainability Week.

Wärtsilä has delivered a number of projects in the region, including Singapore's first-ever pilot grid-scale battery energy storage system ...

Singapore could sit at the "core" of new regional electricity grids in Southeast Asia, according to research from Rystad Energy.

The technology group Wärtsilä has signed an Engineering, Procurement and Construction (EPC) contract for a new 100 MW/100 MWh ...

To substantiate the desktop research, the study interviewed experts and visited sites to investigate existing and potential demonstration projects that apply such energy storage ...

East Asia, led by China, alone can achieve the 420-gigawatt (GW) target of the International Renewable Energy Agency for pumped storage ...

The largest energy storage system in Southeast Asia opened on Jurong Island on Thursday (Feb 2), in another push for solar power adoption ...

East Asia Power Energy Storage Project

The ASEAN power grid allows countries in Southeast Asia to trade electricity freely to meet rising demand, among other benefits. Southeast Asia is a developing region ...

As Asia gears up for a shift to renewable energy, energy storage has come to the fore. But the transition to cleaner power can be a bumpy ride. To navigate the uncertain ...
