

Where is the largest battery energy storage system in Finland?

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, proudly announces the groundbreaking of one of Finland's largest battery energy storage system (BESS) in Nivala Municipality, Northern Ostrobothnia.

Are energy storage systems a solution to Finland's energy transition?

Energy storage systems offer a solution. "This groundbreaking is an important moment for Finland's energy transition and a concrete step toward a more flexible, resilient, and decarbonized energy system," said Jussi Jyrinsalo, Senior Vice President at Fingrid.

How will a new battery energy storage system help the Finnish grid?

After the start of commercial operations in 2026, the project will contribute an important balancing function to the Finnish grid, supporting the Finnish renewable energy expansion. The groundbreaking ceremony took place in the afternoon on Monday the 26th of May on the site near Nivala where the battery energy storage system will be built.

Where is the energy storage facility located?

The energy storage facility is in the Mertaniemi area of Lappeenranta and operates as part of the regional energy structure. The investment project was developed by Ardian Clean Energy Evergreen Fund's Finnish investment platform eNordic in cooperation with Lappeenranta Energia.

Finnish energy and environmental technology company Olion has been selected by Dalian Henliu Energy Storage Power Station Company Ltd to provide heat pumps for a battery ...

The new 30 MW energy storage plant - with a storage capacity of 30 MWh - is located in Ylikk& #228;l& #228;, close to the city of Lappeenranta in Southeast Finland. Known as ...
