

In December 2023, the Federal Ministry for Economic Affairs and Climate Action (BMWK) published its "Power Storage Strategy" to accelerate the development of new capacities.

French firm TotalEnergies has taken investment decisions on six new battery storage projects in Germany, with nearly EUR160m earmarked for their development. The ...

2 days ago; Energy storage provider Return has partnered with Berlin-based Bessmart to develop and connect four battery storage plants in Brandenburg, Saxony-Anhalt, and Saxony. ...

Israeli renewable energy developer Econergy Renewable Energy has entered the German market through the acquisition of two battery energy storage system (BESS) projects ...

The expansion of Europe's energy storage installations has slowed, largely attributed to diminished demand. This trend is exemplified by ...

Among others, the German Association of Energy and Water Industries, the German Renewable Energy Federation, and the German Association of the New Energy ...

TotalEnergies plans to invest EUR160m (\$172.8m) in six new battery storage projects in Germany, totalling 221MW of capacity. The projects have been developed by TotalEnergies ...

BW ESS is a global energy storage owner-operator, moving with speed to develop and build market-leading energy storage projects across ...

Swiss investment fund MW Storage has selected storage specialist Fluence to develop a large-scale, battery-based storage project near the Czech border in the town of ...

German battery energy storage system (BESS) developer ju:niz Energy has been acquired by EQT, with the Swedish investor announcing the move as part of a new strategy to ...

Energy storage is vital for integrating renewable energy, ensuring reliability of power supply, and reducing greenhouse gas emissions. BESS stands out for its affordability, driven by ...

The German government has committed to reaching net-zero carbon emissions by 2045 and phasing out coal by 2038. The battery storage ...

TotalEnergies plans to invest EUR160m (\$172.8m) in six new battery storage projects in Germany, totalling 221MW of capacity. The projects have ...

Nofar Energy signed a seven-year fixed-price agreement for its 104.5 MW/209 MWh Stendal energy storage project in Germany.

The launch of these projects marks a major milestone in TotalEnergies' development of battery energy storage capacity in Germany, ...

In the following, we provide an overview of the recent developments of the legal framework of BESS projects and outline which obstacles to BESS projects still require further ...

Swiss investment fund MW Storage has selected storage specialist Fluence to develop a large-scale, battery-based storage project near ...

TotalEnergies is launching 221 MW of new battery energy storage systems (BESS) in Germany, where the company already has 100 MW under construction. ...

German government opens public consultation on new frameworks to procure energy resources, including long-duration energy storage (LDES).

German government opens public consultation on new frameworks to procure energy resources, including long-duration energy ...

It is the second project of its size that Eco Stor has revealed. Image: Eco Stor. German-Norwegian firm Eco Stor has revealed another ...

From a long-term perspective, electrical storage technologies will reduce overall system costs in every case if the cost of storage technology develops favourably, even if one assumes a ...

Dutch energy storage company GIGA Storage has entered the German market with the acquisition of a project for a 350-MW/1,400-MWh ...

At the sites of the power plants in Hamm and Neurath, an intelligent, net-worked storage system is being built. Learn more about the project.

The German government published its Electricity Storage Strategy in December, with a comment period for trade associations closing yesterday.

As Germany innovates towards its aims of renewable energy sources, battery storage systems have emerged to

stabilize the grid and improve energy use. The German ...

TotalEnergies is launching 221 MW of new battery energy storage systems (BESS) in Germany, where the company already has 100 MW under ...

3 days ago; TotalEnergies develops battery-based electricity storage solutions, an essential complement to renewable energies. Find out more about our ...

The launch of these projects marks a major milestone in TotalEnergies' development of battery energy storage capacity in Germany, where the Company has ...
