

Home Solar System Costs in Canada

How much does a solar system cost in Canada?

The following is a summary of solar installation costs in Canada for 2025: Ontario: Solar panel system cost in Ontario costs between \$2.42 to \$3.05 per watt depending on the type of installation, with the average 5kW system costing between \$17,500 up to \$25,000 before any rebates or incentives.

How many solar panels do I need in Canada?

For an average Canadian home using 10,908 kWh annually, you would need about 23 solar panels if each panel is 350 watts and you use a production ratio of 1.4. Understanding the cost of solar panels in Canada requires consideration of the following factors: Location: Solar efficiency and cost vary by region.

What affects residential solar prices in Canada?

Residential solar prices in Canada depend on system size, panel type and installation costs. Provincial labour rates and local utility rules affect final solar installation prices across Canada. Government grants, tax credits, and utility rebates can reduce upfront solar costs and improve return on investment.

Why are solar panels so expensive in Canada?

The main reason was a surge in manufacturing capacity, basically more panels being made than were immediately needed, leading to intense competition. Since Canada imports a lot of its panels, this global trend definitely put downward pressure on module costs here. But here's where it gets interesting for us in Canada.

Is the ROI on solar panels getting better in Canada?

ROI on solar panels is getting better in Canada. As the cost of electricity continues to rise in Canada, the ROI on solar panels has gone up. As long as utility prices are increasing, the cost of solar power will remain low, resulting in a decrease of the cost of solar panels for homes over the long term.

Are solar panels a good investment in Canada?

The cost of solar panels in Canada might seem high, but solar can offer significant savings if your monthly energy bills are steep. For homes with monthly bills exceeding \$100, solar is an attractive option to reduce those costs. The effectiveness of a solar system also hinges on your home's orientation and roof design.
