

How much does an outdoor power supply cost in New Zealand

Which power supply is best for camping in New Zealand?

Being the smallest type of portable power supply for camping, portable power bank stands to be the best option for campers who are hiking New Zealand's epic trails. If travelling to New Zealand campsites by car or campervan, you can get electricity through your vehicle's battery.

Why should I buy a portable power station?

If you're going camping, off the grid or preparing for an emergency, our portable power station provides enough power to keep your appliances or devices operating.

Can you get electricity while camping in New Zealand?

Segueing from the point above, one final way you can get electricity while camping in New Zealand is by hooking up to a power supply in a campground. In New Zealand holiday parks and campgrounds, these are known as "powered sites".

How much does an off-grid system cost in New Zealand?

For each load, the expected power consumption and hours of use are listed. Typically for a well installed quality Off Grid system in New Zealand, the approximate cost will be about \$6000 - \$7000 per kWh of daily usage. It therefore makes a lot of sense to minimise your daily kWh consumption through good design and wise choices.

Can you get electricity from a car in New Zealand?

If travelling to New Zealand campsites by car or campervan, you can get electricity through your vehicle's battery. To access this battery power, however, you'll need a power inverter with a car adapter to connect to the cigarette lighter port.

How much energy does New Zealand use a day?

Reduce waste through efficiency, and increase conservation. Use energy in proportion to the amount available. The average Grid connected home in New Zealand uses about 15 to 25 kWh per day (3 to 5 people). A low user household (1 to 3 people) uses 10 to 15 kWh per day, and a high user household (4+ people) uses 25 kWh or upwards per day.
