Are enerdrive inverters reliable?

Enerdrive has state of the art,easy to use AC power inverters designed to be efficient and reliablein harsh Australian conditions. Our true sine wave inverter range offers reliable service for providing AC power and 5V USB*power for your motor home,boat,caravan,4WD or commercial vehicle.

What happens if the inverter is switched off?

If the inverter is switched off,with AC input present,the inverter will pass the AC through to the inverter output side. If the AC input is removed,the inverter will stay in the off position. If the inverter is switched on,with AC input present,the inverter will pass the AC through to the inverter output side.

Why do you need an enerdrive inverter?

This helps to keep your appliances running with almost no break time on AC transferand allows for a much simpler installation on-board. This Enerdrive inverter is built to operate basic equipment such as power tools,computers,microwave ovens,televisions and other appliances that use up to 2000W of power for operation.

What is an inverter & how does it work?

Inverters is a 4 metre AC lead with molded Male/Female IEC Plugs fitted. This allows the installer to cut the lead and hardwire the IEC plugs directly. This will speed up installation time and eliminate any connection issues within the plug. Ask Us a Question Thank you! Your product question has been submitted. We will respond to you shortly.

What size cable do I need for my enerdrive inverter?

In the Enerdrive product manual it recommends cable size of 120mm²but the recommended optional wiring kit is only 95mm². Why is this? We reached out to Enerdrive regarding this as they manufacture both the inverter,and the recommeneded cable kit. They have advised that the spec in the manual will be updated soon.
