

Latest new energy storage policies in Armenia

What will Armenia's Energy Strategy look like in 2021?

The 2021 Energy Strategy considers maximum use of the country's renewable energy potential to be a key policy priority. The Armenian government expects solar PV capacity to reach 100 MW by 2024 and 1 000 MW by 2030, and at that point to account for at least 15% of total generation. Some increase in wind is also expected.

Will Armenia's energy sector transition through 2040?

The Armenian government approved the Energy Sector Development Strategic Programme (hereinafter "Energy Strategy") in January 2021, setting the path for the sector's transition through 2040. The publication and approval of this strategic document are welcomed and should form a useful basis for Armenia's future energy legislation.

How to develop a national energy strategy in Armenia?

Formulate an Energy Research, Development and Innovation Strategy, including the setting of clear priorities within thematic areas and applied research, to ensure that priorities are linked with those of the national energy strategy adopted in January 2021. Armenia 2022 - Analysis and key findings. A report by the International Energy Agency.

What challenges do Armenian researchers face in the energy sector?

Armenian researchers in the energy sector, as in other sectors, face challenges that include low levels of state funding, lack of structures for cooperation among research institutes, universities and industry, and requirements for university professors to teach a large number of hours in order to receive a full salary.

Can renewables reduce Armenia's dependence on natural gas?

Renewables have the potential to reduce Armenia's dependence on natural gas, all of which is imported, as well as dependence on the country's Soviet-era nuclear power plant. There are several potential medium-sized hydropower sites in the country that have been studied for several decades.

Will Armenia introduce third-party access to gas?

An agreement signed by EAEU members in 2019 commits Armenia to introducing third-party access, among other reforms aimed at facilitating cross-border gas trade; a final agreement on this is expected to be signed in 2022. Around 85% of Armenia's gas supply is procured from Russia via pipelines passing through Georgia.

By 2030, access to electricity for 70% of households from a modern source of electricity or light is one of the ambitious economic and social goals of the new energy policy in Madagascar.
