

We were entrusted with the technical project reconstruction line design and construction. LMT base stations are placed on water towers, as well as on metal poles, and on the roofs of ...

On 17 July 2024, the Rail Baltica joint venture RB Rail AS, representing the Ministries of Climate of Estonia, Transport of Latvia, and Transport and Communications of Lithuania, announced ...

The cost of building new sites is six times the cost of upgrading; this shows why it was crucial in this study to identify and utilize the existing infrastructure.

The only other airport handling regular commercial flights is Liepaja International Airport. airBaltic is the Latvian flag carrier airline and a low-cost carrier with ...

The deal foresees the construction of 200 new 5G base stations during the year, providing coverage of the 5G network in Riga and the vicinity and major cities of Latvia, Bite said.

La seule solution est donc d'attendre qu'Instagram vous restitue votre compte et ne tombez pas dans le piège des utilisateurs qui vous promettent de solutionner votre problème moyennant ...

Due to the exponential increase in the number of users, the next-generation cellular networks are resource-constrained in power and bandwidth. Power consumption is one of the critical ...

To date, more than 300 base stations have been designed and built. BELSS supplied and installed a sensor system for the State Border Guard. Within the ...

The successful and timely completion of ongoing construction projects is threatened by the rapid rise in construction costs already experienced and by inflation ...

Within the cellular network, the base transceiver station (BTS) constitutes more than 56% of the overall cellular network energy consumption.

This paper develops a method to consider the multi-objective cooperative optimization operation of 5G communication base stations and Active Distribution Network ...

This paper discusses green base stations in terms of system architecture, base station form, power saving technologies, and green ...

Investment projects in Construction, Transport and Logistics must fulfil following criteria: The investment amount in 3 years should be at least 5 million euros (in Riga - at least ...

The increasing demand for cellular communication services requires high number of cellular base stations distributed over land resulting in greater demands on energy usage, and high pollution ...

This study presents an overview of sustainable and green cellular base stations (BSs), which account for most of the energy consumed in ...

This paper reviews the recent studies conducted on green networking and communication for next-generation networks with adverse effect on the climate. Technological ...
