

Sweden- based Niam Infrastructure and Evecon have joined forces to develop up to 110 MW of renewable energy projects in Latvia, including 84 MW of solar power and 26 MW ...

Targale, Latvia -- On November 1, 2024, Targale Wind Park held its grand opening, unveiling Latvia's first major energy storage facility. Hoymiles, as a key technology ...

Producing green energy for a cleaner tomorrow Evecon develops wind, solar and energy parks in Estonia, Latvia and Lithuania Development project volume ...

Swedish real asset investment firm Niam and Estonian renewables developer Evecon have decided to partner in Latvia on the ...

Niam Infrastructure has partnered with Evecon to construct and operate up to 84 MWp of solar power and 26 MW of energy storage across 11 project sites in Latvia.

Swedish investment firm Niam and Estonian developer Evecon have formed a partnership to implement solar energy and energy storage projects in Latvia. Under this ...

Swedish real asset investment firm Niam and Estonian renewables developer Evecon have decided to partner in Latvia on the deployment of 84 MWp of solar power ...

Latvenergo, Latvia's leading energy company, plans to install 250 megawatts (MW) of energy storage capacity by 2030. This ambitious target is ...

Latvia's Energy Strategy 2050 outlines major changes in renewable energy production and storage, with significant investments planned in wind, solar, biomass, and ...

Which Baltic states need a new PV system? Estonia, Latvia and Lithuania have seen uneven development in PV installations to date, and the three Baltic states are still highly dependent ...

Summary: The Latvian government has launched a major tender for photovoltaic module installations to boost renewable energy adoption. This article explores project requirements, ...

This Energy Policy Review was prepared in partnership between the Government of Latvia and the IEA. It draws on the IEA's extensive knowledge and the inputs of expert peers from IEA ...

Latvian Energy Storage Photovoltaic Project Plan

Latvian renewable energy developer PurpleGreen Energy B plans to build a 400 MW solar power plant in Balvi, in the northern Latgale region of Latvia, on the border with Russia.

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...

What is China's energy storage capacity? Of all the types of energy storage in China, CAES will represent 10% by 2025 and then surge to 23% by 2030, if all goes to plan. The China ...

What policy planning documents are in force in Latvia? iament and of the Council on the promotion1.2.2.2. There are currently a number of policy planning documents (including ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the ...

In 2023, Estonia's solar power capacity reached 822 MW, Lithuania's 1,165 MW, while Latvia's stood at only 500 MW. The new European Energy project will significantly boost ...

The Project will be built by SUNOTEC and is expected to be grid connected and fully operational by March 2027 with Danish Sun Energy ...

Niam Infrastructure has partnered with Evecon to construct and operate up to 84 MWp of solar power and 26 MW of energy storage across 11 project sites in ...

Clean energy investment company Niam Infrastructure and Estonian renewable power developer Evecon have announced plans to build a new solar-plus-storage portfolio in ...

Latvenergo, Latvia's leading energy company, plans to install 250 megawatts (MW) of energy storage capacity by 2030. This ambitious target is part of a broader strategy to ...

European Energy has started the construction of a major solar farm in Latvia. The 148MW project is located near Targale in Ventspils county and, as one of the largest in the ...

Green Genius unveils plan for 100-MW solar project in Latvia Lithuanian renewables developer Green Genius said today it plans to build a 100-MW solar photovoltaic ...

The Project will be built by SUNOTEC and is expected to be grid connected and fully operational by March 2027 with Danish Sun Energy providing development of all the ...

Efficient energy storage technologies for photovoltaic systems The integration of PV and energy storage in

smart buildings and outlines the role of energy storage for PV in the context of ...

In 2023, Estonia's solar power capacity reached 822 MW, Lithuania's 1,165 MW, while Latvia's stood at only 500 MW. The new ...
