Will Mexico colocate battery energy storage systems?

Future wind and solar energy projects in Mexico will be required to colocate battery energy storage systems equivalent to 30% of their capacity, a senior government official told the Senate on Tuesday.

Who is Mexico Energy Partners?

Mexico Energy Partners provides industrial and commercial customers with customized energy efficiency and power quality solutions through advanced battery storage systems and intelligent energy management solutions.

Does Mexico have a 30% energy storage mandate?

A month after India introduced an energy storage mandate for renewable energy plants and China scrapped its own, Mexico has stepped forward with an ambitious 30% capacity requirement, alongside plans to add a further 574 MW of batteries by 2028.

What is Mexico's Energy Strategy?

Guadalajara, Mexico, March 6th, 2025 /PRNewswire/ Mexico's energy demand is constantly evolving, driven by economic growth, industrial expansion, and growing population. In response, the government has launched a national energy strategy targeting 54% renewable electricity generation by 2030, alongside urgent upgrades to aging grid infrastructure.

What is Mexico's energy policy?

In recent years, Mexico's energy policy has gradually evolved, and the increasing emphasis on renewable energy has made the energy storage industry's position in the Mexican market increasingly prominent.

How will Mexico's energy reforms affect the private sector?

Islas said that the energy reforms, which went into effect earlier in March, provide a series of mechanisms for the private sector to participate in the electricity market. The first option is for a private company to sell all the electricity produced by a renewable energy plant to Mexico's state-owned utility CFE.
