

New Energy Power Generation Site

What is powerconnex New Albany Energy Center?

The proposed facility, the PowerConneX New Albany Energy Center, project is a natural gas fired power generation facility located in New Albany, Licking County, Ohio. The facility will be sited on approximately 48.6 acres and have a maximum total generating capacity of up to 120 megawatts.

What is Newedge renewable power?

NewEdge Renewable Power supports power generation across America by prospecting, qualifying and developing sites with significant and untapped potential. With a focus on utility-scale battery storage, utility-scale solar and community solar projects, the NewEdge team specializes in front-of-the meter power applications.

What services does Newedge renewable power offer?

We support leading brands via Development Services Agreements and other project development services. NewEdge Renewable Power supports power generation across America by prospecting, qualifying and developing sites with significant and untapped potential.

Will renewable capacity additions support the growth of electric power generation?

We expect that planned renewable capacity additions will support most of the growth in U.S. electric power generation, which we expect will increase by 2% in 2025 and by 1% in 2026. The U.S. electric power sector produced a total of 4,155 billion kilowatthours (kWh) of electricity in 2024, up 3% from 2023.

Are tech companies looking for new power projects?

Across the nation, tech companies are snapping up real estate and seeking new power projects to feed their energy-hungry operations. The foundation for a warehouse is visible in the foreground at Entergy's Orange County Advanced Power Station, a 1,215-megawatt facility under construction, Monday, Feb. 24, 2025, in Orange, Texas.

How much will Entergy invest in a new power plant?

The filings said Entergy would invest \$3.2 billion for the main power plant, along with a separate but related 754-MW gas-fired plant that would be built in southern Louisiana, and transmission lines to serve the facilities.

New energy power generation projects have been built in places such as coal mine industrial sites, coal mining subsidence areas, idle spaces at power plants, and oil and ...

NewEdge supports power generation across America by prospecting, qualifying and developing sites with significant and untapped potential. With a focus on utility-scale battery storage, utility ...

Global research in the new energy field is in a period of accelerated growth, with solar energy, energy storage

New Energy Power Generation Site

and hydrogen energy receiving extensive attention from the global research ...

The solar farm will generate enough energy to power approximately 12,000 homes each year. Through these strategic initiatives, SWEPCO is committed to ensuring a reliable ...

The proposed facility, the PowerConneX New Albany Energy Center, project is a natural gas fired power generation facility located in New Albany, Licking County, Ohio. The facility will be sited ...

The proposed facility, the PowerConneX New Albany Energy Center, project is a natural gas fired power generation facility located in New Albany, Licking ...

DOE has identified 16 potential sites uniquely positioned for rapid data center construction, including in-place energy infrastructure with the ...

Power generation industry updates, news, and insights including gas, renewables, coal, nuclear, energy storage, hydrogen, and more.

Duke Energy's various mix of generation resources, include nuclear, coal-fired, oil- and natural gas-fired, and hydroelectric power plants.

A spike in demand for electricity from tech companies competing in the artificial intelligence race is upending forecasts for natural gas-fired power in the U.S., as utilities reconsider it as a major ...

In our latest Short-Term Energy Outlook (STEO), we expect that U.S. renewable capacity additions--especially solar--will continue to drive the growth of U.S. power ...

As China ramps up generation of clean power, its need for a new type of power system is on the rise, as the nation aims to address challenges brought on by unstable ...

Entergy operates one of the cleanest large-scale generation fleets in the United States. Our power generation fleet is made up of natural gas, oil, nuclear, ...

A spike in demand for electricity from tech companies competing in the artificial intelligence race is upending forecasts for natural gas-fired power in the U.S., ...

DOE has identified 16 potential sites uniquely positioned for rapid data center construction, including in-place energy infrastructure with the ability to fast-track permitting for ...

NRG Energy is joining with GE Vernova and Kiewit Corp. in a plan to build four new natural gas-fired power plants. The companies on Feb. 26 ...

New Energy Power Generation Site

The generation of electricity is essential to modern society, as it powers industries, cities, and homes. There are several ways to generate it, each with its own characteristics, ...

The country plans to maintain crude oil output at over 200 million tonnes and add over 200 million kilowatts of new energy power generation capacity. According to the ...

JANS - Entergy Mississippi is prioritizing community needs, while preparing to meet future energy demands. Company leaders shared early plans to build new power ...

Company leaders shared early plans to build new power generation and welcomed input from residents near a selected site on West ...

Explore six innovative New green power technologies poised to revolutionize renewable energy. Learn about their potential impact on ...

NewEdge supports power generation across America by prospecting, qualifying and developing sites with significant and untapped potential. With a focus on ...

Company leaders shared early plans to build new power generation and welcomed input from residents near a selected site on West County Line Road in Ridgeland, during a ...

3 days ago· EPA Administrator Lee Zeldin announced new guidance on New Source Review (NSR) preconstruction permitting requirements to provide much needed clarity for the buildout ...

Entergy Louisiana is proposing to build about 1,500 MW of gas-fired power generation at the site to provide electricity for the \$5 billion data center operation.

NextEra Energy Resources is advancing America's energy future with the largest and most diverse portfolio of power generation and infrastructure solutions. As one of the nation's top ...

Titan power station is a permitted power station in Hwange, Matabeleland North, Zimbabwe. It is also known as Beifa power station, Titan New Energy power plant, Titan New Energy ...

Entergy Louisiana is proposing to build about 1,500 MW of gas-fired power generation at the site to provide electricity for the \$5 billion data ...

With every new project, we renew our commitment to a clean energy future by developing, acquiring and operating renewable power generation assets with geographical and ...

The energy expansion requires innovation and deployment of new technologies to provide dispatchable electricity supporting other clean energy technologies. Carbon capture ...
