

# New Zealand power generation container customization

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

What are the sound pressure levels available for genset containers?

Lower sound pressure levels are available on request. The standard ventilation is designed for ambient temperatures from -25°C to +34°C. All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C.

Secondly, lithium battery customization can meet the power requirements of different application scenarios. Different application scenarios have greatly different requirements for power output. ...

Proudly New Zealand owned and operated since 1991, Power Plant Supplies is New Zealand's leading specialist in the supply and support of quality power generation equipment. We are ...
