

North Korea builds green communication base station on the plateau

Why is North Korea building a missile base near Chinese border?

Let us know. North Korea has quietly built and operated a sprawling long-range missile base near the Chinese border that stores Leader Kim Jong Un's most advanced strategic weapons, demonstrating the regime's ongoing efforts to advance its nuclear strike capabilities, a think tank said.

Is North Korea building a wall near South Korea?

North Korea is building sections of what appears to be a wall in several places near its border with South Korea, new satellite images reveal.

Did North Korea build a border barrier near the DMZ?

BBC Verify commissioned high-resolution satellite imagery of a 7km stretch of the border as part of a project to look at changes North Korea was making to the area. These images appear to show at least three sections where barriers have been erected near the DMZ, covering a total of about 1km close to the eastern end of the border.

Did North Korea start digging trenches near Kaesong?

Work on the trenches appears to have begun shortly after North Korea staged choreographed demolitions of a road near Kaesong, a western North Korean border city, and a combined road and rail section near the Koreas' eastern border on Oct. 15.

Could North Korea build a secret missile base to launch a nuclear strike?

You have 15 articles left to gift, this month. North Korea has built a secret missile base that could be used to launch a nuclear strike against the United States, according to satellite research.

What does North Korea's border action show?

This border action further illustrates North Korea's defiance, as Kim's nuclear ambitions expand and his posture toward both Seoul and Washington hardens. This satellite image from Planet Labs PBC shows digging along a road in the Demilitarized Zone between North and South Korea on Tuesday, Oct. 29, 2024. Planet Labs PBC via AP
