

Outdoor Power Supply Three Degrees

Should you buy an outdoor power strip?

If those two sockets in your outdoor outlet aren't enough to fulfill your outdoor power needs, then you'll want to invest in a good outdoor power strip. These handy appliances can multiply a single socket into six or even 10, allowing you to power multiple strings of lights or various outdoor appliances simultaneously.

Are outdoor power strips weather resistant?

Outdoor power strips come in a variety of sizes, from small three-outlet models up to large 10-outlet beasts. Unlike indoor models, these rugged, weather-resistant power strips can endure extreme temperatures and even downpours. Understanding what weather conditions an outdoor power strip is rated to handle is key to purchasing the right one.

Can a Loitinsy power strip be used outside?

There are also small mounting brackets on the four corners of the power strip's housing, which give you the option of mounting it to an exterior wall if you plan to use it outdoors over the long term. The Loitinsy power strip's outlets worked well, including all three USB outlets, after splashing the power strip with water.

Are EIGSO power strips weatherproof?

EIGSO's weatherproof outdoor power strip is one of the most affordable models that still offers a high degree of weather resistance. With its IPX6 rating, it can withstand continuous rainfall thanks to drainage holes on the back of the power strip that allow water that finds its way into the sockets to drain out.

Are APS power strips weatherproof?

Along with being weatherproof, the power strip also has a durable feel, thanks to a tough plastic housing. It barely registered a scratch during our drop tests. Along with its excellent weather resistance, the APS power strip also offers a nice collection of socket options. Its six three-prong outlets are well spaced with no obstructions.

Is EIGSO a good power strip?

Its compact size also makes it less conspicuous than other bulkier power strips. The EIGSO's build quality is excellent. The on/off switch is protected from rain by a rubber casing, and the cable has a rotatable connection to the power strip's housing that prevents twisting that can cause damage.

About this item WHAT'S IN THE BOX - Includes one Philips Hue 100W outdoor power supply unit; Perfect for your front doors backyard, front yard, driveway, sidewalk and more. **REQUIRES A HUE BRIDGE** - Unlock the power of Hue and enjoy automations control from anywhere ...
