

# Outdoor base station in Argentina

Does China have a space station in Argentina?

LA PRENSA/Courtesy. Despite its public stance against the militarization of space, the Chinese People's Liberation Army (PLA) continues to invest in and enhance its military space capabilities, including a deep space station in Argentina, which provides the PLA with global space tracking and surveillance capabilities.

Does Argentina have a 'space station' built on Argentine soil?

Argentina's effort to distance itself from China is becoming increasingly evident. It is now serious about conducting a formal inspection of a Chinese "space station" built on Argentine soil.

Why is China building a space tracking base in Argentina?

China's space tracking base construction in the heart of Argentina creates concerns about regional dynamics and national security, for both Argentina and the US.

Does Argentina have a space station?

During an interview, Susana Malcorra, who served as Argentina's foreign minister from 2015 to 2017, emphasized that Argentina lacked physical oversight of the station's operations. In 2016, she revised the China space station deal to specify that it should only be used for civilian purposes.

Should the new government look at China's Argentine Space Station?

Still, the new government should look closely at China's Argentine space station. Javier Milei's presidential victory in Argentina may be a turning point in the country's relations with China. Initially, Milei was critical of China and skeptical of international trade blocs.

How many hours a day can Argentina use a space station?

Argentina's National Commission for Space Activities (CONAE) is limited to using the station for only 10 percent of its operational time, which equates to less than two hours per day.
