

What are the new grant schemes for solar energy in Malta?

The government of Malta launched six new grant schemes to incentivise the production, storage and use of renewable energy as part of the EUR9 million investment. The aid for solar energy will accommodate households with already existing systems to utilise battery powered systems and help new families setup the installation of new solar panel systems.

How much is a feed-in tariff for a photovoltaic system?

A second scheme is also being re-issued, offering a beneficial feed-in tariff for photovoltaic systems under 40kWp. The feed-in tariff is set at EUR0.15 per kWh for 20 years and does not include a grant. The application process is now simpler due to automatic approval of the first part of the application process.

What grant schemes are being launched in Malta for 2022?

New grant schemes have been launched in Malta for 2022 for the production and storage of solar panel energy with PV and battery systems. (+356) 2148 0500 Ext 118 [email#160;protected] Blog FAQ Facebook-f LinkedIn-in Products Solar Panels Solar Battery Storage Heat Pumps Electric Car Battery Chargers Off Grid Grants Financing MicroInvest

Who is eligible for a photovoltaic energy scheme?

This particular scheme is open only to private individuals (natural persons) for use on their residential properties, and for organisations that are not carrying out an economic activity other than the generation of electrical energy from photovoltaic systems for use on communal residences. To be eligible, an Applicant must:

What is the new battery ready PV system installation scheme?

scheme New Battery Ready PV System Installation This scheme is available for those who opt to install a new solar panel system with hybrid inverter. By choosing this scheme the system will be suitable to the addition of a solar battery in the future and will be able to benefit from a grant of up to EUR3,000 and a 10c5 feed-in tariff.

Who is eligible for a photovoltaic tariff scheme?

This scheme is funded through national funds and applies to private individuals (natural persons) for use on their residential properties, and for organisations that are not carrying out an economic activity, provided that photovoltaic installation should have no active feed-in tariff allocation.

Applicants in both Malta and Gozo can choose from various grant options, including PV systems with standard or hybrid inverters, hybrid inverter ...
