

# Portable power supply for construction sites

What type of power do you need for a construction site?

From generators and air compressors to distribution equipment, you have various options to power each jobsite. The type of equipment you use, your construction schedule and the worksite location all play a role in choosing the right type of power supply. [What Is Temporary Power for Construction Sites and Why Do You Need It?](#)

How do I choose a temporary power supply for my construction site?

Cables and cable ramps are essential accessories for power generation equipment. Cables help you extend power throughout your jobsite, and cable ramps protect the cables from potential damage in high-traffic areas. Consider the following factors when choosing a temporary power supply for your construction site.

What is temporary power for construction sites?

[What Is Temporary Power for Construction Sites and Why Do You Need It?](#) Temporary construction power provides a short-term power supply for equipment, tools, lighting and on-site offices. It's vital for performing construction work in areas that are not connected to the electrical grid.

Why does my construction site need a temporary power delivery?

At some point, every jobsite requires some temporary power delivery. One reason may be because permanent utility power has not yet been installed on your construction site. You could also need power delivered to a hard-to-reach location, or power at the site isn't sufficient for extra tools, lighting, or trailers.

How to get temporary power for construction projects?

The question of how to get temporary power for construction projects before a connection to the power grid is established has many possible answers. Unless you can spend the time and money to install temporary utility power poles, most of those answers involve generators, which are the most common solution.

What are the best portable generators for construction?

When reviewing portable generators for construction, one has to pay close attention to the wattage each of them offer. In the case of this DuroMax portable generator, it offers 7,500 running watts and 8,500 peak watts which guarantees construction workers and contractors they'll be able to use as many power tools as they need, simultaneously.
