

Serbia Coal Mine Energy Storage Project

Originally scheduled to begin operations in 2022, the mine is now expected to start production in 2026. Currently, two overburden removal systems are under construction, with a ...

Status of Renewable Energy Deployment Fossil fuels dominate Serbia's energy mix as of 2017 with 87% of the total primary energy supply (TPES), mainly consisting of an abundance of ...

Two large, grid-supporting battery storage facilities have been approved in Scotland, according to the BBC. Billed as Europe's largest such effort, perhaps of most ...

Serbia's underground coal mining regions, burdened by pollution and ancient technology, face an uncertain future, as plans to replace coal with ...

Recent research confirms that citizens of the coal-impacted regions, who almost exclusively rely on employment in the coal industry, are kept in limbo between promises of ...

In the next 25 to 30 years, Serbia will have to replace its coal-based power plants, which currently have a capacity of about 4,000 megawatts. This will require a fundamental ...

Serbia plans to build solar power plants, wind farms, and pumped-storage hydropower plants, but also gas-fired power plants, energy storage batteries, and hydrogen facilities, in order to ...

The strategy acknowledges the significant regional and local impacts of the energy transition, particularly in areas dependent on coal mining and thermal power plants, such as ...

Investments totaling EUR180 million are being made to install two new mining systems (Bagger-Transporter-Stacker or BTO) at the Radljevo mine. These systems will enable ...

"The Kostolac Wind Farm showcases our joint endeavour of moving away from coal. It symbolizes our dedication to reducing reliance on fossil fuels, decarbonising our ...

One of the major investments underway is in coal mining, including the construction of several systems needed to enable the opening of the Radljevo open pit mine in ...

At the public debate on the Program for the implementation of Energy Strategy for the period between 2017 and 2023, State Secretary at the Ministry of Mining and Energy ...

Recent research confirms that citizens of the coal-impacted regions, who almost exclusively rely on

employment in the coal industry, are ...

Serbia plans to build solar power plants, wind farms, and pumped-storage hydropower plants, but also gas-fired power plants, energy storage batteries, and hydrogen ...

The state-owned company Resavica has officially submitted a request to the Ministry of Environmental Protection for approval to conduct an Environmental Impact ...

With the proposed amendments to the Law on the Use of Renewable Energy Sources, Serbia will promote the introduction of energy storage facilities, Minister of Mining ...

Renewable energy is expected to account for 29% of Serbia's total domestic primary energy production, with solid biomass contributing 61% and hydropower making up ...

The coal is mined in the basin from the end of 19th century, but the turning point in coal production came in 1952 when the first pit Field A was opened. The complex is owned ...

State-owned utility Public Power Corp. (PPC), once heavily reliant on coal, is at the forefront of the energy transition, aiming to phase out coal use by 2026. PPC holds permits for ...

Transforming Abandoned Coal Mines into Energy Storage Solutions Pumped Storage Hydropower (PSH) provides over 90% of the nation's grid-scale energy storage, playing a ...

In fact, the Kostolac site will sit on former coal mining land, marking a fresh transition towards green energy. The Kostolac wind project is also a first for Siemens Gamesa ...

With the proposed amendments to the Law on the Use of Renewable Energy Sources, Serbia will promote the introduction of energy ...

Serbia plans to build solar power plants, wind farms, and pumped-storage hydropower plants, but also gas-fired power plants, energy storage ...

Serbia plans to invest EUR 88.8 million by 2030, through its just transition action plan, in activities aimed at mitigating the impacts of the ...

Serbia plans to invest EUR 88.8 million by 2030, through its just transition action plan, in activities aimed at mitigating the impacts of the planned reduction in coal-based ...

Serbia is undergoing a transformative shift in its energy sector, with foreign-owned renewable energy projects playing a crucial role in shaping the country's green future. The ...
