

# Should outdoor base stations be installed indoors or outdoors

Can a charging station be installed outside?

While your charging station can be installed indoors or outdoors, an outdoor charger must be specifically designed to offer protection from the elements, such as rain and lightning.

Should you install an EV charging station outdoors?

The primary reason that people opt to have their EV charging station installed outdoors is for convenience. Installing the charger outdoors allows you to choose an area that may be much closer to where you park so that you won't have to worry about running a long cord out from your garage to your vehicle.

Should I Choose A Level 1 or 2 charging station?

However, if you do decide to install the charging station outdoors, it is highly recommended that you choose a level 2 station. For outdoor charging, a level 1 station generally won't cut it due to the added uncertainties of outdoor charging and the additional time it takes compared to a level 2 charger.
