

Slovenia New Energy Storage Power Station

How much energy does Slovenia need?

Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan.

Why is there no new power plant construction in Slovenia?

Several decades of no new major power plant construction in Slovenia has driven the country, as well as some other countries, to a situation where the gap between consumption and production of electricity has become significant. The issue has become so serious that energy and climate policy has been placed at the top of all political debates.

Is there a second nuclear power station in Slovenia?

Slovenia's infrastructure ministry has issued the Energy permit for the construction of a second unit at Krsko, Slovenia's only nuclear power station, a step that allows permitting procedures to begin.

Will Slovenia's only coal power plant close in 2033?

The Fit-for-55 goal of a 55% drop in emissions is for 2030. Slovenia aims to achieve it only by 2033, the deadline it set for quitting the use of coal. But chances are that the country's only coal power plant, Termoelektrarna Sostanj (TES), and its accompanying mine Premogovnik Velenje, will close within a few years or operate at minimum capacity.
