

Solar panel export prices

How much can you get paid for exporting solar panels?

The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to 40p per kWh. That means that if you've got solar panels, choosing the best export tariff could earn you hundreds of pounds extra in payments every year. Looking at the latest available offers in April 2025, we found that:

What is the highest export tariff for solar panels?

The highest export tariff currently on offer is the Solar Savings Exclusive tariff from Good Energy, which pays 40p/kWh; however, it's only available to customers who have bought both solar panels and a battery from Good Energy Solar or JPS Renewables. More on: The Smart Export Guarantee explained

What is a solar PV export tariff?

Try our online calculator to estimate the costs and returns of a solar system for your home. A solar PV export tariff is the payment you receive for excess solar power sent to the grid. What is the SEG and what tariffs are companies offering now?

Can solar energy be exported back into the National Grid?

But that excess energy can be used elsewhere, by exporting it back into the National Grid, which then distributes it to wherever it is needed. The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported under the Smart Export Guarantee (SEG) scheme.

Are US solar panels at risk from China's tariffs?

US-manufactured solar panels, which use upstream material from China, might see the largest cost increases given the steeper duty rates and a lack of supply chain outside of China. Battery Energy Storage Systems (BESS) are at even higher risk of substantial price increases due to tariffs, given China's control over the BESS supply chain.

Can You import solar panels from China to the US?

There are virtually no imports of silicon solar cells or panels from China to the U.S. due to hefty duties in the form of Section 301, Section 201, and anti-dumping/countervailing duty tariffs. It's not important to understand what all of those mean; just know that it's cost-prohibitive to send solar panels from China to the U.S.

This marks the first increase in FOB China module prices, following upstream price gains that began in the first week of July amid government ...
