

Solar panel factory support

Where are solar panels made?

Our state-of-the-art, modern manufacturing facilities in Florida, Malaysia, and Vietnam produce dependable, world-class solar panels with an unblemished quality record for the U.S. market. We also have a near-perfect management resolve to remain a committed partner to our customers over the entire 30-year lifespan of their solar projects.

Are solar panels working well?

Since the solar panels have been installed, everything is working well and is functional. Always kept me informed about the process of our installation. Professional run company from the salesman, engineers, and installers. Came back 5 days after installation to ensure all was running smooth.

What can you monitor with SolarEdge?

SolarEdge offers Monitoring Platform to monitor your solar energy system. Other services include Smart Devices, mySolarEdge Metering & Sensors, Communication Software, Commercial Inverters, Power Optimizers, Grid Services, and Support for Homeowners and Installers.

What is a solar bill & production page?

The Solar Bill/Production page will help provide utility bill explanations, solar savings details, utility credits, and solar billing/financing details. The Tax page will provide you answers to general tax questions. This should not be considered tax advice/guidance and you should consult a qualified tax professional for assistance and details.

What is the most satisfying part of buying a solar system?

The most satisfying part is when you start to see your panels producing the first day! I purchased my solar solution from SunLux in early 2019. My sales person, Kyle, was knowledgeable on the various components of the solution and helped me choose the right system for my house.
