

Solar system home costs in Norway

Is it worth getting solar panels in Norway?

High electricity prices and the urge to go green mean many in Norway are pondering whether it is worth getting solar panels. Solar panels turn the sun's rays into energy which can be sold to the power grid or used for your own home.

What are the new solar rebates in Norway?

Norway's clean energy agency Enova will increase the maximum PV system size eligible for rebates from 15 to 20 kW and the maximum subsidy amount from 1,250 to 2,000 NOK (\$226.7) per kW installed. In addition, new subsidies of up to 10,000 NOK will be introduced for energy management systems that are often installed alongside solar arrays.

How do solar panels work in Norway?

Solar panels turn the sun's rays into energy which can be sold to the power grid or used for your own home. Figures from The Norwegian Water Resources and Energy Directorate (NVE) show that solar power capacity in Norway has increased ten-fold since 2015. Despite this, the Scandinavian country still lags behind others.
