

How are high tariffs affecting electricity supply in South Sudan?

The high tariffs have become constraints to connecting significant number of household customers. Proposed development programs for improving electrical power supply in South Sudan during the upcoming period: The challenge for the Government is therefore to implement accelerated programs to deliver sufficient, reliable and affordable

Does South Sudan have electricity?

Electricity is supplied through diesel powered generators and yet, more than 90% of the South Sudanese people are without access to electricity, with an estimated only 1% of the 11 million population connected to the nation's electricity power grid and most of those are in the capital, Juba .

What is South Sudan's role as a power utility?

Its role as a power utility is expected to intensify as programmes to increase electricity access in South Sudan are implemented. It is proposed under the Electricity Bill 2015 as the regulatory entity for the electricity sector in South Sudan. It would function as the energy regulator whose functions would include the creation of regulations.

Why is electricity so expensive in South Sudan?

infrastructures, frequent power breaks, lack of spare parts and lack of technical persons. Electrical equipment's are brought far distant industrial countries, therefore they are very expensive. The electricity supply institution (ESI) in South Sudan is characterized by: Main electricity supply provided from captive generation;

Should South Sudan remove import duty on solar products?

In line with the East Africa Community member states, South Sudan should remove import duty on solar products. Such measures could also result in improved affordability of the end products by households. Tariff rises should also be linked to prevailing exchange rates and inflation levels since solar companies cannot change their prices.

Does Sudan have a power sector?

the country has curtailed foreign investment in the Sudanese power sector, but it is expected to increase with the cessation of the civil conflict. In June 2004 the United Arab Emirates (UAE) pledged to invest in the Sudanese power sector following the signing of a peace accord. In January 2006, the Export/Import
