

Spain deploys new energy storage

Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

How will Spain increase its energy storage capacity?

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

Will Spain start a new energy storage scheme?

The Ministry of the Environment of Spain has launched its latest financial support scheme for energy storage, aiming to kickstart 2.5-3.5GW.

What does the European Commission say about energy storage in Spain?

La Moncloa. 17/03/2025. European Commission approves new 700 million aid scheme to boost energy storage in Spain[News]The Ministry of Ecological Transition and Demographic Challenge will promote the large-scale deployment of this technology by co-financing investments of up to 85%.

Can Spain deploy large-scale energy storage with co-financing of 85%?

The European Commission on Monday greenlit a new aid scheme to enable Spain to deploy large-scale energy storage with co-financing of up to 85%. The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain.

What is Spain's energy storage program?

For stakeholders in battery storage, thermal storage, and pumped hydro, this program offers not only financial backing but also long-term stability and political support. Spain has launched a EUR700 million energy storage program to support battery, thermal, and pumped hydro projects, aiming to deploy 2.5-3.5 GW of capacity.

A 5MW/20MWh BESS project Powin and Hitachi deployed for Galp in Portugal. Image: Powin / Hitachi / Galp. Galp has kicked off construction on five new battery energy ...

The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain. Subsidies will be available for ...

The scheme aims to deploy between 2.5 and 3.5 gigawatts (GW) of new storage capacity, enhancing the flexibility and resilience of the national power system while enabling ...

The Saft systems have been installed by EXKAL as part of the European STORY project that aims to

Spain deploys new energy storage

demonstrate new energy storage technologies and their benefits in ...

Case study EXKAL is Spain's leading manufacturer of refrigeration systems and a key supplier to the refrigeration and retail sectors in Europe and Worldwide with a wide range of remote and ...

The European Commission has approved a substantial EUR699 million state aid scheme aimed at bolstering energy storage in Spain, positioning the nation firmly on the path ...

There exists a strong potential for energy storage to provide ancillary services in the Iberian Peninsula's booming renewables market, but regulatory stability should be provided to ...

What is solar + storage Espana? RE+ Events, in partnership with pv magazine, is announcing a new event, Solar + Storage Espana. Solar has become a dominant energy source of energy ...

Spain has taken a decisive step in strengthening its energy infrastructure with the launch of a EUR700 million support scheme aimed at ...

Spain receives EUR700 million in EU funding to deploy large-scale energy storage, boosting renewable energy integration and grid stability. Learn about the program's scope, targets, and ...

India and Spain both saw major developments in their respective pumped hydro energy storage (PHES) sectors yesterday (26 September).

The Spanish government approved Royal Decree 7/2025 on June 24, resolving several long-standing obstacles hindering the secure and lawful ...
