Is Sri Lanka's power grid vulnerable to disruptions?

Experts have long cautioned that Sri Lanka's fragile power grid is vulnerable to disruptions. Macaque monkey walking in the power lines in the North Central Province in Sri Lanka. (Representational image) iStock Sri Lanka experienced a nationwide power outage on Sunday after a monkey interfered with an electrical grid in a Colombo suburb.

Did a monkey intrude into a power station in Sri Lanka?

A nationwide blackout in Sri Lanka has been blamed on a monkey that intruded into a power station south of Colombo. Power is gradually being restored across the island nation of 22 million people, with medical facilities and water purification plants being given priority.

Why did Sri Lanka have a power outage?

Sri Lanka experienced a nationwide power outage on Sunday after a monkey interfered with an electrical grid in a Colombo suburb. The power failure began at approximately 11:00 local time (05:30 GMT), plunging the island nation into darkness. Authorities worked to restore power in some areas, but the full duration of the outage remained unclear.

Can monkeys cause a power outage in Sri Lanka?

"Only in Sri Lanka can a group of monkeys fighting inside a power station cause an islandwide power outage," wrote Jamila Husain, editor-in-chief of local newspaper Daily Mirror. In a report published on Monday, the newspaper said engineers have been warning consecutive governments "for years" to upgrade its power grid or face frequent blackouts.

Did a rogue monkey knock out Sri Lanka's power grid?

"A rogue monkey knocked out Sri Lanka's entire power grid after triggering a total failure at a substation in Colombo," wrote an X user. "One monkey = total chaos. Time to rethink infrastructure?"

Will Sri Lanka have power outages in 2022?

"The national power grid is in such a weakened state that frequent islandwide power outages may be expected if there is a disturbance even in one of our lines," it quoted an unnamed senior engineer saying. Sri Lanka experienced widespread blackouts during its economic crisis in 2022.

Sri Lanka experienced the mass outage on February 9 when a sub-power station was disrupted by the electrocution of a monkey.
