

Swedish energy storage container assembled house

Where is a container house built?

We continue to discover for you. Our container house on today's tour is from Sweden. Private residence for a family of five built with eight assembled 20' and 40' shipping containers. The house is built on a steep lot near a lake outside Stockholm. The project was completed in 2019 in Kolvik, Sweden, by the Mans-tham architecture office.

Where is living in a container built?

The house is built on a steep lot near a lake outside Stockholm. The project was completed in 2019 in Kolvik, Sweden, by the Mans-tham architecture office. Living in a Container explores projects made with shipping containers around the world and shares them for you.

Is a shipping container a sustainable choice for Home Builders?

Chosen for its structural integrity and prefabricated build, the shipping container is a sustainable and long-lasting choice for home builders. Måns Tham, architect and founder of Måns Tham Arkitektkontor, recently finished work on a multi-year shipping container project that's home to a family of five.

What is a shipping container interior?

The interior is a composition of rare finds and re-used building components. A shipping container is not a great starting point for a home because of its limited width, 2,4 m. Also, as soon as you take out any part of the corrugated walls between two containers to make a wider room they lose their structural strength.

This 1600 sqft shipping container home was built of eight assembled, 20' and 40' re-used, high cube shipping containers. The house is built on a steep lot next to a lake, outside of Stockholm.
