

Syria Communications Base Station Construction

How to improve telecommunications infrastructure in Syria?

Recently, the Syrian Minister of Communications and Information Technology, Hussein al-Masri, provided several measures to improve the telecommunications infrastructure in Syria. This includes issuing licenses for five internet service providers, with plans to grant 20 more within two weeks.

Will Syria build a fibre optic network?

Syria's government is in talks with regional telecoms companies Zain, Etisalat, STC and Ooredoo for a roughly \$300 million project to develop the country's fibre optic communications network, a senior Syrian official and a second official said.

Why are Syria's infrastructure projects a sign of re-emergence?

The projects are a sign of Syria's re-emergence after years of conflict and international isolation and of the investment it can potentially attract for infrastructure construction. They also show the way that U.S., Gulf and Turkish administrations and companies seek to take a lead in a country formerly aligned with Iran.

Which regions have managed to preserve telecommunications infrastructure in Syria?

Some regions under the control of the Syrian government, such as the capital Damascus and the provinces of Homs and Hama, have managed to preserve their telecommunications infrastructure.

How did the telecommunications sector grow in Syria?

Syria's telecommunications sector grew after Bashar al-Assad assumed power in 2000--a stark contrast to the era of his father, Hafez al-Assad, who followed a strict security approach. He limited the telecom infrastructure to fixed landlines without any expansion into internet services throughout the country.

What is happening in Syria's telecommunications sector?

Residents in Syria are still awaiting the transitional government to take tangible steps towards remedying and reconstructing a devastated telecommunications sector.
