

Syria imports solar power for home use

Is putting solar panels on roofs a solution in Syria?

"The solution to the problem isn't putting solar panels on roofs," Syria's interim Energy Minister Mohammad al-Bashir told The Associated Press. "It's securing enough power for the families through our networks in Syria. This is what we're trying to do."

Where does solar energy come from in Syria?

The use of solar energy spreads from northwestern Syria, which started relying on solar power around 2016, passing through areas in the north-east, ending with the areas under the control of the Syrian regime, which directed a clear trend to generate electricity through them, not only in large industrial facilities but even in homes.

Are solar panels a viable alternative energy source in Syria?

As an option that seemed to be one of the best alternative energy sources in Syria, reinforced by the absence of fuel, the spread of solar panels began in most regions, respectively, years ago, amid "government" support and adoption of this trend.

Are solar panels allowed in Syria?

The Syrian Interim Government (SIG), which controls areas of rural Aleppo, issued a decision last May, excluding solar panels from customs duties at all crossings for a period of three months, until 31 July.

Are solar panels a better option than losing electricity in Syria?

According to an opinion poll conducted by Enab Baladi, a number of Syrians residing in various governorates considered that alternative energy through solar panels is a better option than losing electricity despite its high costs and regardless of the controlling parties.

How much energy does a Syrian house need?

Nabil, 36, a resident of the countryside of Daraa governorate, told Enab Baladi that operating an entire house on solar energy needs at least 12 million Syrian pounds, a budget that is difficult for most families to secure in light of the deteriorating economic conditions.
