

# The company with the largest export volume of photovoltaic modules

What are the key characteristics of global PV module manufacturers?

This report, drawing on the latest developments in the 2025 market, analyzes the key characteristics of the top 10 global PV module manufacturers across four dimensions: technological capability, vertical integration, international presence, and performance in the European market.

How has China shaped the global supply and demand of solar PV?

Government policies in China have shaped the global supply, demand and price of solar PV over the last decade. Chinese industrial policies focusing on solar PV as a strategic sector and on growing domestic demand have enabled economies of scale and supported continuous innovation throughout the supply chain.

What is the future of photovoltaics in Europe?

Against the backdrop of an accelerating global energy transition, the total installed photovoltaic capacity worldwide is expected to exceed 1,200GW by 2025. The commercial and industrial (C&I) market in Europe is expanding in parallel, with solar PV becoming a key tool for businesses to manage energy consumption and drive green transformation.

What is the PV Bill of material market report?

InfoLink Consulting is excited to announce the release of "PV Bill of Material Market Report" that will help businesses and stakeholders navigate geopolitical risks and drive informed decision-making with comprehensive market information and in-depth analysis on BOMs of the PV supply chain.

Table 3. Annual photovoltaic module shipments, 2006-22 ... Data source: U.S. Energy Information Administration, Form EIA-63B, Annual and Monthly Photovoltaic Module ...

Global photovoltaic industry, 2024 ranking Who are the top 10 photovoltaic module producers in the world? Each year, Wood Mackenzie ...

Between fiscal years 2022 and 2024, India increased its import of solar modules 23-fold, primarily to the US, says IEEFA and JMK Research.

China exported 15.2 GW of modules in November 2024, down 12% MoM from 17.34 GW and down 14% YoY from 17.71 GW, according to InfoLink's customs data. China exported ...

Discover which companies are producing the highest number of solar panels around the world, ranked from ninth to first.

Investigation of PV industry found Greece, Israel, and Turkey becoming GW-scale markets in 2021, putting

# The company with the largest export volume of photovoltaic modules

the total amount at 19 countries, indicating increasing PV demand ...

The European Union was the biggest destination for China's PV exports in 2022, buying nearly \$23 billion worth of products, up 113 percent year-on-year. This is equivalent to ...

The shipment data of the top ten shows that PERC products account for about 22% of the total volume, whereas n-type TOPCon module shipments account for nearly 70% ...

With more than 300 GW of modules sold and a vertically integrated production line from wafers to modules, the company has ranked number one globally for five consecutive ...

This report, drawing on the latest developments in the 2025 market, analyzes the key characteristics of the top 10 global PV module manufacturers across four dimensions: ...

JinkoSolar emerged as the leader in 2023, shipping over 75 GW of solar modules, with more than 60% being n-type products. This strategic emphasis on n-type technology ...

During the boom years of the European PV industry in 2010-2013, companies like Vikram and Tata briefly tasted success from export business, ...

LONGi, the king of the PV industry, will supply 66.44GW of modules in 2023, up 42% year on year. Most of the manufacturers in the first tier achieved module shipments of ...

JinkoSolar was the leading solar module manufacturer in 2024, according to Wood Mackenzie. Image: JinkoSolar. The leading crystalline ...

TrendForce has ranked the top six module manufacturers by shipment volume in 2022, with Longi topping the list, followed by Trina Solar and JinkoSolar. JA Solar, Canadian ...

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than ...

The U.S. Energy Information Administration (EIA), the statistical and analytical agency within the U.S. Department of Energy (DOE), prepared this report. By law, our data, analyses, and ...

With more than 300 GW of modules sold and a vertically integrated production line from wafers to modules, the company has ranked number one ...

In terms of parameters, many bidding companies increase the power requirements to 600W+, and do not limit the module length and cell ...

# The company with the largest export volume of photovoltaic modules

TrendForce has ranked the top six module manufacturers by shipment volume in 2022, with Longi topping the list, followed by Trina Solar ...

PVTIME - The year 2024 is poised to be a transformative year for the global photovoltaic industry, characterised by substantial innovation and ...

This report, drawing on the latest developments in the 2025 market, analyzes the key characteristics of the top 10 global PV module manufacturers across four ...

The export volume of the PV modules reached 78.6 gigawatts in the first six months, up 74 percent year-on-year, according to the Ministry of Industry and Information ...

LONGi, the king of the PV industry, will supply 66.44GW of modules in 2023, up 42% year on year. Most of the manufacturers in the first ...

Given Pakistan's reduced demand for photovoltaic systems, it is expected that the volume of Chinese photovoltaic module imports will continue to decline in the fourth quarter of 2024. This ...

JinkoSolar was the leading solar module manufacturer in 2024, according to Wood Mackenzie. Image: JinkoSolar. The leading crystalline silicon solar manufacturers have ...

Its products, especially solar panels and lithium batteries, are competitive in the global market with low prices and high quality, and relevant companies have ...

Explore the 2024 plans of leading PV module manufacturers, uncovering trends, technology shifts, and capacity expansions in the dynamic ...

Today, China's share in all the manufacturing stages of solar panels (such as polysilicon, ingots, wafers, cells and modules) exceeds 80%. This is more than double China's share of global PV ...

China's JinkoSolar was the world's largest PV module supplier in 2023, with 78.5 GW of global shipments. In its financial results for 2023, the ...
