

Trinidad and Tobago Telecommunication Base Station Wind Power Construction Standards

How much wind energy does Trinidad and Tobago have?

Trinidad and Tobago possesses facilities including industrial ports, and equipment such as heavy-lift cranes that can support the wind energy industry during the construction and operations phases. In excess of 25GW both onshore and offshore. Furthermore, the report puts forward a target of 2GW of installed wind energy capacity by 2035.

Why is offshore wind important in Trinidad & Tobago?

Offshore wind also reduces the issue of land usage associated with other forms of renewable energy, such as solar energy. Trinidad and Tobago possesses facilities including industrial ports, and equipment such as heavy-lift cranes that can support the wind energy industry during the construction and operations phases.

Why should Trinidad and Tobago invest in wind energy?

There are various driving factors towards integration of wind energy technologies into Trinidad and Tobago's energy mix. These factors include a high resource potential; a strong demand for green hydrogen; supporting industrial infrastructure; and a skilled energy workforce.

Can wind be harnessed in Trinidad & Tobago?

Some challenges will need to be overcome before wind can be harnessed, including legislative roadblocks and capital considerations. As a signatory to the 2015 Paris Agreement, Trinidad and Tobago has made a commitment towards the world's efforts to limit global warming to 1.5°C or less compared to pre-industrial levels.

How can Trinidad and Tobago accelerate the energy transition?

Effectively, Trinidad and Tobago's energy transition must be accelerated. NGC is playing a critical role in advancing the energy transition through investments, strategic partnerships and collaboration for national policy, strategy and project development.

Does Trinidad and Tobago support decarbonisation?

Trinidad and Tobago has clearly signalled its stance as supporting decarbonisation through its iNDCs, the National Climate Change Policy, the National Environmental Policy and the Government's Vision 2030. However, renewable energy is yet to be incorporated into the laws that govern power generation in Trinidad and Tobago.
