

Why is the UAE developing a more resilient energy sector?

Today, oil and gas exports account for about 30 percent of the UAE's total economic activity. The share of additional energy sources is rapidly expanding to meet growing energy demands. At home, the UAE is building a more resilient energy sector through the development of additional energy sources.

How will UAE's future energy demand change?

Recent changes in immigration and labour laws may increase the number of residents, which constitutes the majority of the UAE population. When factoring in the rise of the UAE's citizen population, the future energy demand may be growth beyond the 127-TWh value. UAE's emissions by sector and Energy Strategy 2050 targets.

How does the UAE's energy strategy shaped capacity expansion?

Capacity expansion is shaped by sustained population growth, electrification of industry, and the UAE Energy Strategy 2050, which commits to a 50% clean-energy mix by mid-century. Gas-fired plants continue to anchor baseload supply, yet solar additions and the 5.6 GW Barakah nuclear plant are steadily lowering the carbon intensity of generation.

What is the United Arab Emirates (UAE) power market report?

The United Arab Emirates (UAE) Power Market Report is Segmented by Power Generation Sources (Thermal, Nuclear, and Renewables), End-User Sector (Residential, Commercial and Industrial, and Utilities), and Transmission and Distribution (Qualitative Analysis Only). The Market Sizes and Forecasts are Provided in Terms of Installed Capacity (GW).

How is the UAE power market segmented?

The UAE power market is segmented by power generation source and transmission and distribution (T&D). By power generation source, the market is segmented into thermal, renewables, and other sources. Only qualitative analysis is provided for power transmission and distribution.

Over the last decade, the UAE has increased renewable energy capacity more than any other country in the world, and by 2030 aims to more than triple this capacity again to reach a total ...
