

Wattage and degree of outdoor power supply

How much wattage do outdoor lights need?

Before calculating wattage requirements, you'll need to identify exactly why you're installing outdoor lights. Security lighting typically requires higher wattage (50-100 watts for traditional bulbs or 10-20 watts for LEDs) to illuminate larger areas and deter intruders.

How do I choose the right wattage for my outdoor space?

When selecting lighting for your outdoor space, determining the right wattage is key to creating an effective lighting plan. There are a few key factors to consider that will inform your wattage needs: The size of the outdoor area you wish to illuminate is the starting point for determining wattage.

How does wattage affect outdoor lights?

Wattage directly determines how bright your outdoor lights will shine and how much electricity they'll consume. A higher wattage bulb produces more lumens (the actual measure of brightness) but draws more power from your electrical system.

How do you determine wattage for outdoor lighting?

The size of the outdoor area you wish to illuminate is the starting point for determining wattage. Small spaces like entryways and pathways require lower wattage fixtures, while larger yards, driveways, or garden spaces need proportionally more wattage to sufficiently light the entire area.

What wattage should I use for patio lighting?

What's the recommended wattage for patio and deck lighting? For deck and patio lighting, use varied wattage based on function: 10-15 watts LED per 100 square feet for general illumination, 5-7 watts LED for step lights, and 8-12 watts for task lighting areas (grilling or dining spaces).

What wattage is best for landscape lighting?

A 60-watt incandescent bulb (800 lumens) can be replaced with an 8-10 watt LED. Similarly, a 100-watt incandescent (1600 lumens) equals a 16-20 watt LED. This efficiency difference makes LEDs much more cost-effective for outdoor lighting, despite their higher initial purchase price. What wattage is appropriate for landscape feature lighting?
