Do you need a pure sine wave inverter?

Energy Independence: If you're looking to go off-grid or just cut down on your electricity bills, a pure sine wave inverter is a must. It guarantees reliable power for all your needs. The Renogy 3000W 12V Pure Sine Wave Inverter is designed to deliver high-quality AC power for off-grid solar power systems.

Why do you need a sine wave inverter?

Most appliances in your home use AC power, so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level. A pure sine wave inverter also saves you money, as it's much more efficient than the older, jagged wave inverters.

Should I buy a modified sine wave inverter?

When it comes to solar array inverters, you do not want to buy a modified sine wave inverter. Contrary to pure sine wave inverters, modified sine wave inverters only attempt to mimic a sine wave, which can result in regular and bad disruptions to the grid and to your experience.

How does a sine inverter work?

A sine inverter takes the DC output of your solar array, converts it to AC, and does so in a way which replicates as closely as possible the pure sine wave of grid power alternating current. Moreover, pure sine wave inverters amplify the converted current to differing strengths of wattage and voltage.
