How to choose a solar inverter?

Solar inverters are generally rated according to the amount of power they can put out continuously. In general, you want to have a rating that is at least equivalent to the wattage output of your solar panel array. However, don't get an inverter that's much larger, or else the efficiency of your installation will begin to drop.

What is a solar inverter?

The solar inverter is one of the most important parts of a solar system and is often overlooked by those looking to buy solar energy. This review highlights the best inverters from the world's leading manufacturers to ensure your solar system operates trouble-free for many years.

How efficient is a solar inverter?

A solar inverter's efficiency describes how much power is lost during the conversion from DC to AC power. An inverter will approach its maximum rated efficiency when you are drawing close to its maximum rated output. Modern solar inverters are all very efficient, but there's still a lot of variation between specific models.
